## Former CIA Agent to Speak

A man whose business was spying for 25 years will address the students of Bernalillo High School Monday at 9 a.m. in the school auditorium.

He is Dr. Kurt Singer, who was an espionage agent for the Central Intelligence Agency for a quarter of a century. The author of 36 books dealing with spies and spying, Singer will discuss the internal threat of Communism to this country and the difference between propaganda and fact.

Felipe C. Gonzales, princi-

pal of the school, said he was delighted to have Singer speak to the students. He said too many books on this subject are written by persons who have never really been involved in what they write about. He said he thought it would help the students realize the Communist threat is very real and that it is not "oceans away".

Singer feels it is his job to visit schools "and to warn them against the tantrums of dictators and their plans and to tell the story of espionage and counter-espionage in connection with this."

Gonzales said the address is open to the public.

A filibuster is a person who makes an unlawful military expedition into a foreign country.
